RULE 237 - ADHESIVES AND SEALANTS

RULE 237 CONTENTS

1. PURPOSE
2. APPLICABILITY
3. EXEMPTIONS
4. DEFINITIONS
5. REQUIREMENTS
6. ADMINISTRATIVE REQUIREMENTS
7. MONITORING AND RECORDS
RULE 237

1 PURPOSE: To limit the emission of volatile organic compounds (VOCs) from adhesives and sealants and associated primers, and from related surface preparation solvents, cleanup solvents, and strippers.

2 APPLICABILITY: This rule applies to any person who:

2.1 Manufactures, sells, offers for sale, or supplies an adhesive or sealant product for use in the district; or
2.2 Uses an adhesive or sealant product; or
2.3 Uses a surface preparation solvent, a cleanup solvent, or a stripper; or
2.4 Solicits, requires the use of, or specifies the application of an adhesive or sealant product, surface preparation solvent, cleanup solvent, or stripper that does not comply with this rule.

3 EXEMPTIONS

3.1 HOUSEHOLD ADHESIVES: The requirements of this rule shall not apply to household adhesives that are regulated by the State of California and that are defined in Section 4.32 of this Rule.

3.2 MEDICAL EQUIPMENT MANUFACTURING: The requirements of this rule shall not apply to solvent welding operations used in the manufacturing of medical devices, including, but not limited to, catheters, heart valves, blood cardioplegia, machines, tracheotomy tubes, blood oxygenators, and cardiatory reservoirs.

3.3 MATERIALS REGULATED UNDER OTHER DISTRICT RULES: The requirements of this rule shall not apply to any material regulated by the following rules:

3.3.1 TIRE REPAIR: The requirements of this rule shall not apply to materials used for tire repair if such products are labeled by the manufacturer: “For Tire Repair Only”

3.3.2 UNDERSEA WEAPONS: The requirements of this rule shall not apply to the manufacture, maintenance, or repair of undersea-based weapon systems.

3.3.3 LOW-VOC MATERIALS: The requirements of this rule shall not apply
to materials containing 20 grams or less per liter (0.17 lbs/gal) of VOCs, less water and exempt compounds, as applied.

3.3.4 SMALL CONTAINER: The requirement of this rule shall not apply to materials sold or supplied in non-reusable containers that are designed to hold no more than 8 fluid ounces. This exemption does not apply to plastic cement welding adhesives.

3.3.5 RESEARCH AND DEVELOPMENT OPERATIONS: Sections 5.1, 5.2 and 5.3 shall not apply to the testing and evaluation of the materials in research and development laboratories, quality assurance laboratories, or analytical laboratories, provided that these sources maintain records that comply with Section e.

3.3.6 CONTACT ADHESIVES: The requirements of Section 5.1 shall not apply to contact adhesives subject to the Consumer Product Safety Commission regulations in 16 Code of Federal Regulations, Part 1302 provided that adhesives are sold in packages of 128 fluid ounces or less.

3.3.7 EXEMPTION - AEROSOL CLEANING SOLVENTS: The requirements of Section 5.3 shall not apply to the use of aerosol cleaning solvents at the stationary source provided that the total usage of the aerosol cleaning solvents does not exceed 160 fluid ounces per day.

3.3.8 EQUIPMENT CLEANUP: The VOC requirements in Section 5.3 shall not apply to ethyl acetate used to clean adhesive application equipment when:

3.3.8.1 The equipment is used in the manufacturing of transdermal drug delivery products, and
3.3.8.2 Fewer than 3 gallons per day of ethyl acetate, averaged over a calendar month, are used.

3.3.9 LOW USAGE: The requirements of Sections 5.1, 5.2 and 5.3 shall not apply to the materials used by the stationary source if the total combined volume of these materials used at the stationary source does not exceed 55 gallons during any calendar year. Commercial and industrial operations that use such materials and that are exempted pursuant to this section shall comply with Section 7.1. This exemption cannot be used by any person using the alternative record-keeping method pursuant to Section 7.1.7.
3.3.10 The requirement of this rule shall not apply to cyanoacrylate adhesives.

3.3.11 The requirement of this rule shall not apply to reactive adhesives that are cured through the application of ultraviolet light, electron beam, visible light, radio frequency, or microwaves.

4 DEFINITIONS

4.1 Acrylonitrile-Butadiene-Styrene (ABS) Welding Adhesive: Any adhesive intended by the manufacturer for use to weld acrylonitrile-butadiene-styrene (ABS) pipe. ABS pipe is made by reacting monomers of acrylonitrile, butadiene, and styrene and is normally identified with an ABS marking.

4.2 Adhesive: Any material that is used to bond one surface to another surface by attachment.

4.3 Adhesive Primer: A coating applied to a substrate, prior to the application of an adhesive, to provide a bonding surface.

4.4 Aerospace Component: The fabricated part, assembly of parts, or completed unit of any aircraft or space vehicle, excluding tires, and including models, mock-ups, prototypes, and coupons.

4.5 Aerosol Adhesive / Aerosol Adhesive Primer: An adhesive or adhesive primer packaged as an aerosol product in which the spray mechanism is permanently housed in a non-refillable can designed for hand-held application without the need for ancillary hoses or spray equipment. Aerosol adhesives include special purpose spray adhesives, mist spray adhesives, and web spray adhesives.

4.6 Aerosol Cleaning Solvent: A material used as a surface preparation solvent, a cleanup solvent, or a stripper and consisting of liquid and/or gaseous solvent and propellants packaged in a hand-held, pressurized, non-refillable, container. The container expels pressurized aerosol materials when a valve on the container is depressed.

4.7 Application Equipment: A device such as a spray gun, pot, hose, brush, roller, electrostatic sprayer, non-propellant spray bottle, or squeegee used to apply an adhesive or sealant product, a surface preparation solvent, a cleanup solvent, or stripper.

4.8 Architectural Sealant/Primer: Any sealant or sealant primer intended by the
manufacturer to be applied to stationary structures, including mobile homes, and their appurtenances. Appurtenances to an architectural structure include, but are not limited to: hand railings, cabinets, bathroom and kitchen fixtures, fences, rain gutters and down-spouts, and windows.

4.9 **Automotive Engine Compartment Adhesive:** An aerosol adhesive designed for use in motor vehicle under-the-hood applications that require oil and plasticizer resistance, as well as high shear strength, at temperatures of 200 - 275 °F.

4.10 **Automotive Glass Adhesive Primer:** An adhesive primer labeled by the manufacturer to be applied to automotive glass prior to installation of the glass using an adhesive/sealant. This primer improves the adhesion to pinch weld and blocks ultraviolet light.

4.11 **Automobile Headliner Adhesive:** An aerosol adhesive designed to bond together layers in motor vehicle headliners.

4.12 **Ceramic Tile Installation Adhesive:** An adhesive intended by the manufacturer for ceramic tile installation.

4.13 **Chlorinated Polyvinyl Chloride (CPVC) Welding Adhesive:** An adhesive labeled by the manufacturer to weld CPVC plastic pipe.

4.14 **Chlorinated Polyvinyl Chloride (CPVC) Plastic:** CPVC plastic is a polymer of the monomer that contains 67 percent chlorine and is normally identified with a CPVC marking.

4.15 **Cleanup Solvent:** A VOC-containing material used to:

4.15.1 Remove a loosely held uncured (i.e., not dry to the touch) adhesive or sealant from a substrate, or

4.15.2 Clean equipment used in applying a material.

4.16 **Closed Container:** A container which has a cover that meets with the main body of the container without any visible gaps between the cover and the main body of the container.

4.17 **Computer Diskette Jacket Manufacturing Adhesive:** An adhesive intended by the manufacturer to bond fold-over flaps to the body of a vinyl computer diskette jacket.
4.18 **Contact Adhesive:** An adhesive that forms an instantaneous bond that cannot be repositioned when substrates, on which the adhesive is applied and allowed to dry, are brought together using momentary pressure.

4.19 **Contact Adhesives-Specialty Substrates:** An adhesive that is intended by the manufacturer to be used for:

- **4.19.1** the bonding of two nonporous substrates;
- **4.19.2** the bonding of decorative laminate in post-forming application;
- **4.19.3** the bonding of decorative laminate to metal, melamine-covered board, or curved surfaces; or
- **4.19.4** the bonding of any substrate to metal, rubber, rigid plastic or wood veneer not exceeding 1/16” in thickness.

4.20 **Cove Base Installation Adhesive:** An adhesive intended by the manufacturer for the installation of cove base (or wall base), which is generally made of vinyl or rubber, onto a wall or vertical surface at floor level.

4.21 **Cured:** Dry to the touch.

4.22 **Cyanoacrylate Adhesive:** An adhesive with a cyanoacrylate content of at least 90% by weight and emits less than 20 grams per liter of VOC as determined pursuant to Section 7.2.11.

4.23 **Drywall Installation:** The installation of gypsum drywall to studs or solid surfaces.

4.24 **Enclosed Gun Cleaner:**

- **4.24.1** A device used to clean spray guns, pots, cups, and hoses, that has a closed solvent container, is not open to the ambient air when in use, and has a mechanism to force cleanup material through the gun while the cleaner is in operation;
- **4.24.2** A device used to clean spray guns, pots, cups, and hoses, that has a closed solvent container, uses non-atomized solvent flow to flush the spray equipment, and collects and returns the discharged solvent to the closed container.

4.25 **Exempt Compound:** Any compound identified as exempt in Section 3 of this rule.
4.26 **Fiberglass:** A fiber made of fine filaments of glass and that is similar in appearance to wool or cotton fiber.

4.27 **Flexible Vinyl:** A non-rigid polyvinyl chloride plastic with at least five percent, by weight, of plasticizer content.

4.28 **Flexible Vinyl adhesive:** An aerosol adhesive designed to bond flexible vinyl to substrates.

4.29 **Hand Application:** The application of a material by manual equipment. Manual equipment includes paint brushes, hand rollers, trowels, spatulas, daubers, rags, sponges, as well as mechanically or pneumatically driven syringes that do not atomize the applied products.

4.30 **High Pressure Laminate:** Sheets of materials, consisting of paper, fabric, or other core material, that have been laminated at temperatures exceeding 265 degrees F, and at pressures between 1,000 and 1,400 pounds per square inch.

4.31 **High-Volume Low-Pressure (HVLP) Application Equipment:** Equipment used to apply coating by means of a spray gun which is designed to be operated, and which is operated between 0.1 and 10.0 pounds per square inch gauge (psig) air pressure, measured dynamically at the center of the air cap and at the air horns.

4.32 **Household Adhesive:** An adhesive subject to Title 17, California Code of Regulations, Sections 94507-94517 (Consumer Products). Household adhesives do not include units of product, less packaging, that weigh more than one pound or contain more than 16 fluid ounces.

4.33 **Indoor Floor Covering Installation Adhesive:** An adhesive intended by the manufacturer for the installation - in an enclosed area not exposed to ambient weather conditions during normal use - of wood flooring, carpet, carpet pads, rubber flooring, resilient tile, vinyl tile, vinyl backed carpet, resilient sheet and roll, or artificial grass. Indoor floor covering installation does not include ceramic tile installation, the installation of perimeter bonded sheet flooring with vinyl backing onto a non-porous substrate, such as flexible vinyl, or sub-floor installation.

4.34 **Key System Operating Parameter:**

4.34.1 A variable that is critical to the operation of an emission control system and that ensures:
4.34.1.1 Operation of the system within the system manufacturer’s specifications, and
4.34.1.2 Compliance with the overall system efficiency standard required by Section 5.4.

4.34.2 Such variables may include, but are not limited to:
4.34.2.1 Hours of operation
4.34.2.2 Temperature
4.34.2.3 Flow rate
4.34.2.4 Pressure

4.35 Laminate Repair / Edge-banding Adhesive: An aerosol adhesive designed for:
4.35.1 the touch-up or repair of items laminated with high pressure laminates (e.g. lifted edges, de-laminations, etc.), or
4.35.2 the touch-up, repair, or attachment of edge-banding materials, including, but not limited to, other laminates, synthetic marble, veneers, wood molding, and decorative metals.

4.36 Leak: A visible liquid solvent leak from a container or a visible liquid mist.

4.37 Low-Solids Material: A material containing 120 grams or less of solids per liter of product.

4.38 Low-Volume Low-Pressure (LVLP) Application Equipment: Spray coating application equipment with air pressure between 0.1 and 10.0 pounds per square inch gauge (psig) and air volume less than 15.5 cubic feet per minute (cfm) per spray gun and that operates at a maximum fluid delivery pressure of 50 psig.

4.39 Marine Deck Sealant / Sealant Primer: A sealant or sealant primer labeled by the manufacturer to seal gaps on wooden marine decks.

4.40 Material: Any material containing VOC including but not limited to an adhesive, adhesive primer, aerosol adhesive, aerosol adhesive primer, sealant, sealant primer, catalyst, colorant, stripper, or solvents used in cleaning.

4.41 Metal to Urethane / Rubber Molding or Casting Adhesive: An adhesive intended by the manufacturer to bond metal to high-density or elastomeric urethane or to molded rubber materials, using heater molding or casting processes, in order to fabricate products such as rollers for computer printers or other paper handling equipment.
4.42 Mist Spray Adhesive: An aerosol adhesive that is not a special purpose spray adhesive, that deliver a particle of mist spray, and that results in the formulation of fine, discrete particles yielding a generally uniform and smooth application of adhesive to the substrate.

4.43 Mounting Adhesive: An aerosol adhesive designed to permanently mount photographs, artwork, and any other drawn or printed media to a backing (paper, board, cloth, etc.) without causing discoloration to the artwork.

4.44 Multipurpose Construction Adhesive: An adhesive intended by the manufacturer for the installation or the repair of various construction materials, including, but not limited to, drywall, sub-floor, panel, fiberglass reinforced plastic, ceiling tile, and acoustical tile.

4.45 Noncompliant Material: A material that:

4.45.1 exceeds the VOC content limits specified in Sections 5.1 and 5.2, and is not exempt pursuant to Rule 900; or

4.45.2 exceeds the VOC content limit and/or composite vapor pressure limit, as applicable, in Section 5.3.

4.46 Non-Membrane Roof Installation / Repair Adhesive / Sealant: An adhesive or sealant intended by the manufacturer for the installation or repair of non-membrane roofs, but is not intended for the installation of prefabricated single-ply roof membrane. This category includes plastic or asphalt roof cement, asphalt roof coatings, and cold application cement.

4.47 Non-Porous Material: A material which does not have tiny openings, often microscopic, to allow the absorption or discharge of fluids.

4.48 Outdoor Floor Covering Installation Adhesive: An adhesive intended by the manufacturer for the installation of floor covering that is not in an enclosure and is expose to ambient weather conditions during normal use.

4.49 Panel Installation: The installation of plywood, pre-decorated hardboard, tile board, fiberglass reinforced plastic and similar pre-decorated or non-decorated panels on studs or solid surfaces.

4.50 Perimeter Bonded Sheet Vinyl Flooring Installation: The installation of sheet flooring with vinyl backing onto a nonporous substrate using an adhesive design to be applied only to a strip up to four inches wide around the perimeter of
the sheet flooring.

4.51 **Plastic:** A synthetic material chemically formed by the polymerization of organic (carbon-based) substances.

4.52 **Plastic Cement Welding Adhesive:** An adhesive made of resins and solvents that is formulated to dissolve the surfaces of plastic and to form a bond between mating surfaces.

4.53 **Plastic Cement Welding Adhesive Primer:** A primer intended by the manufacturer to prepare plastic substrates prior to bonding or welding.

4.54 **Plasticizer:** A material, such as a high boiling point organic solvent, that is incorporated into a vinyl to increase its flexibility, work ability, or distensibility, as determined by ASTM Method E-260-96.

4.55 **Polystyrene Foam Adhesive:** An aerosol adhesive designed to bond polystyrene foam (e.g., Styrofoam®, expanded polystyrene foam, etc.) to substrates.

4.56 **Polyolefin Adhesive:** An aerosol adhesive designed to bond polyolefins (e.g., polyethylene, polypropylene, etc.) to substrates.

4.57 **Polyvinyl Chloride (PVC) Welding Adhesive:** An adhesive intended by the manufacturer to weld PVC plastic pipe.

4.58 **Porous Material:** A material whose surface is permeable to liquids including, but not limited to foam, paper, corrugated paperboard, stone, and wood.

4.59 **Propellant:** A fluid under pressure that expels the contents of a container when a valve is opened.

4.60 **Reactive Adhesive:** An adhesive containing 20 grams or less per liter (0.17 lbs/gal) of VOCs, less water and exempt compounds, as applied, that cures upon exposure to ultraviolet light, electron beam, visible light, radio frequency, or microwave.

4.61 **Roadway Sealant:** A sealant intended by the manufacturer to be applied to public streets, highways, and related surfaces including curbs, berms, driveways, and parking lots.

4.62 **Rubber:** A natural manmade rubber substrate, including, but not limited to
styrene-butadiene rubber, polychloroprene (neoprene), butyl rubber, nitrile rubber, chlorosulfonated polyethylene, and ethylene propylene diene terpolymer.

4.63 **Rubber Flooring:** A flooring material in which both the back and the top surface are made of synthetic rubber and that may be in sheet or tile form.

4.64 **Sealant:** A material with adhesive properties that is applied as a rope or bead and that is formulated for use primarily to fill, seal, waterproof or weatherproof gaps or joints between two surfaces. Sealants include sealant primers and caulks.

4.65 **Sealant Primer:** A material intended by the manufacturer for application to a substrate, prior to the application of a sealant, to enhance the bonding surface.

4.66 **Single-Ply Roof Membrane:** A single sheet of rubber, normally ethylene-propylene diene monomer, that is applied in a single layer to a building roof (normally a flat roof).

4.67 **Solid Material:** The nonvolatile portion of a material that remains after heating a sample of the product at 100°C for one hour.

4.68 **Solvent Welding:** The softening of the surfaces of two substrates by wetting them with a solvent and/or adhesive, and joining them together using a chemical and/or physical reaction(s) to form a fused union.

4.69 **Special Purpose Spray Adhesive:** An aerosol adhesive that is classified by the manufacturer for use as a mounting adhesive, flexible vinyl adhesive, polystyrene foam adhesive, automobile headliner adhesive, automotive engine compartment adhesive, polyolefin adhesive, or laminate repair/edge-banding adhesive.

4.70 **Stationary Source:** A building, structure, facility, or emissions unit which emits or may emit any affected pollutant directly or as a fugitive emission.

4.70.1 Building, structure, facility, or emissions unit includes all pollutant-emitting activities which:

4.70.1.1 Belong to the same industrial grouping, and
4.70.1.2 Are located on one property or on two or more contiguous properties, and
4.70.1.3 Are under the same or common ownership, operation, or control or which are owned or operated by entities which are under common control.
4.70.2 Pollutant-emitting activities shall be considered as part of the same industrial grouping if:
   4.70.2.1 They belong to the same two-digit standard industrial classification code, or
   4.70.2.2 They are part of a common production process. (Common production process includes industrial processes, manufacturing processes and any connected processes involving a common material.)

4.71 **Striper**: A liquid used to remove cured adhesives and/or cured sealants.

4.72 **Structural Glazing Adhesive**: An adhesive intended by the manufacturer to adhere glass, ceramic, metal, stone, or composite panels to exterior building frames.

4.73 **Subfloor Installation**: The installation of subflooring material, typically plywood, over flooring joists. Subfloor installation includes the construction of any load bearing joints in joists or trusses. Subflooring is covered by a finished surface material.

4.74 **Surface Preparation Solvent**: A VOC-containing material used to remove contaminants such as dust, soil, oil, grease, etc., from substrates prior to the application of an adhesive or sealant product.

4.75 **Thin Metal Laminating Adhesive**: An adhesive intended by the manufacturer to bond multiple layers of metal to metal or metal to plastic in which the thickness of the bond line(s) is less than 0.25 mils.

4.76 **Tire Repair**: The expanding of a hole, tear fissure, or blemish in a tire casing by grinding or gouging, applying adhesive, and filling the hole or crevice with rubber.

4.77 **Tire Retread Adhesive**: An adhesive applied to the back of pre-cured tread rubber and to the casing and cushion rubber. Tire retread adhesive may also be used to seal buffed tire casings to prevent oxidation while the tire is being prepared for a new tread.

4.78 **Traffic Marking Tape Adhesive Primer**: An adhesive primer intended by the manufacturer to be applied to surfaces prior to the installation of traffic marking tape.
4.78.1 Traffic marking tape adhesive primer is not one of the coatings included in the definition of “traffic coatings” in Rule 230.

4.78.2 Traffic marking tape is a performed reflective file intended by the manufacturer to be applied to public streets, highways, and other surfaces including, but not limited to, curbs, berms, driveways, and parking lots.

4.79 Volatile Organic Compound (VOC): For the purpose of this rule “volatile organic compound" has the same meaning as in Rule 101.

4.80 Volatile Organic Compound (VOC) As Applied: A VOC as applied means the VOC content of the material as applied including thinners, reducers, hardeners, retarders, catalysts and additives calculated pursuant to Section 7.2.1.

4.81 Volatile Organic Compound (VOC) As Supplied: A VOC as supplied means the VOC content of the original material as supplied by the manufacturer calculated pursuant to Section 7.2.1.

4.82 Waterproof Resorcinol Glue: A two-part resorcinol resin-based adhesive designed for applications where the bond line must be resistant to conditions of continuous immersion in fresh or salt water.

4.83 Web Spray Adhesive: An aerosol adhesive which is not a mist spray adhesive or special purpose spray adhesive.

4.84 Wipe Cleaning: The method of cleaning a surface by physically rubbing it with a material such as a rag, paper, abrasive pad, brush, or a cotton swab moistened with a solvent.

4.85 Wood Flooring: A wood floor surface, which may be in the form of parquet tiles, planks, or strip-wood.

5 REQUIREMENTS

5.1 VOC Content - Adhesives / Adhesive Primers:

5.1.1 A person shall not apply a material that has a VOC content, as applied (as determined per Section 7.2.1) in excess of the limits listed in this section. For a low solids material, the VOC content shall be calculated based on gram per liter of material or pounds per gallon of material including water calculated in grams per liter or pounds per gallon, less water and exempt compounds.

Table 6 - VOC Content for Adhesive Applications onto Substrates

The standards in this table apply to applications not specifically identified in Tables 1, 2, 3, 4, or 5. In this table, if an adhesive is used to bond two different types of substrates with different VOC limits, then higher of the two VOC limits shall apply.

5.2 VOC Content - Aerosol Adhesives / Aerosol Adhesive Primers:
5.2.1 Prior to January 1, 2003, a person shall not use any aerosol adhesive or aerosol adhesive primer unless the VOC content, including the propellant, is no greater than 75 percent by weight as determined by Sections 6.3 and 7.2.2.

5.2.2 Effective January 1, 2003, no person shall use an aerosol adhesive unless the adhesive complies with the VOC limit specified in Table 7 below in percent by weight as determined by Sections 6.3 and 7.2.2.

</table>

5.2.3 Effective January 1, 2003, no person shall manufacture for use in the District any aerosol adhesive which contains any methylene chloride, perchloroethylene, or trichloroethylene, except that an aerosol adhesive manufactured before January 1, 2002 may be sold, supplied, or offered for sale until January 1, 2005, so long as the product container or package displays the date on which the product was manufactured, or a code indicating such date.

5.2.4 In order to qualify as a “Special Purpose Spray Adhesive” the product must meet one or more of the definitions of the adhesives listed in Section 4.69. If the product label indicates that the product is suitable for use on any substrate or application not listed in Section 4.69, the product is classified as either a “Web Spray Adhesive” or a “Mist Spray Adhesive”.

237-17
5.2.5 If a product meets more than one of the definitions of the adhesives listed in Section 4.69, and is not classified as a “Web Spray Adhesive” or “Mist Spray Adhesive”, then the VOC limit for the product shall be the lowest applicable VOC limit specified in Table 7.

5.3 **Solvent Cleanup And Storage Requirements:** A person shall comply with the following requirements:

5.3.1 Materials used for surface preparation, cleaning or stripping shall not exceed the VOC content and the VOC composite vapor pressure limits specified in the table below. The VOC content of the material as applied shall be determined pursuant to Section 7.2.1. The composite partial pressure shall be determined using Section 7.2.9.

Table 8 - VOC Content of Solvents Used for Surface Preparation, Cleanup, and Stripping - VOC Content g/l (lbs/gal) including water and exempt compounds

| STRIPPING: Adhesive or Sealant Products on Substrates | __ | ≤ 9.5 |

5.3.2 A person applying any surface preparation solvent, cleanup solvent, or any stripper must use one of the following methods:
   5.3.2.1 Wipe cleaning.
   5.3.2.2 Non-propellant spray bottles or containers.
   5.3.2.3 An enclosed gun cleaner as defined by Section 4.24.
   5.3.2.4 Soaking application equipment parts in a closed container provided that the container does not exceed five gallons in size and the container is kept tightly covered at all times except when accessing the container.

5.3.3 Closed containers shall be used for the disposal of all VOC-containing cloth, sponges, papers, or other materials used for solvent cleaning.

5.3.4 All VOC-materials shall be stored in closed containers when not in use.

5.4 Emission Control Equipment: As an alternative to utilizing materials that comply with the VOC content standards identified in Sections 5.1 through 5.3, a person may use air pollution control equipment provided the equipment satisfies the following requirements:

   5.4.1 The air pollution control requirement is approved by the Air Pollution Control Officer pursuant to Rule 400, and
   The air pollution control equipment is designed and operated with: A control device efficiency of at least 95 percent on a mass basis, as determined pursuant to Sections 6.4 and 7.2.5, and An emission collection efficiency of at least 90 percent on a mass basis, as determined pursuant to Section 7.2.6.

5.5 Material Application Methods: Effective December 1, 1997.

   5.5.1 A person shall not apply any adhesive or sealant product except as follows:
   5.5.1.1 Hand application.
   5.5.1.2 Dip coat.
   5.5.1.3 Flow coat.
   5.5.1.4 Brush or roll coat.
   5.5.1.5 Electrodeposition.
5.5.1.6 Electrostatic spray.
5.5.1.7 High-volume low-pressure (HVLP) application equipment.
5.5.1.8 Low-volume low-pressure (LVLP) application equipment.
5.5.1.9 Aerosol cans.
5.5.1.10 For contact adhesives only: airless sprayers, air-assisted airless sprayers, and air-atomized sprayers.
5.5.1.11 Any other equivalent method approved in writing by the Air Pollution Control Officer and submitted to and approved by the United States Environmental Protection Agency.

5.6 Prohibition of Sale: A person shall not supply, sell, solicit, or offer for sale, any noncompliant materials as defined in Section 4.45. The prohibition in this section shall apply to any material which will be applied at any physical location within the District.

5.7 Prohibition Of Specification: No person shall solicit, require the use of, or specify the application of any material subject to this rule, if the use or application would violate this rule. The prohibition in this section shall also apply to all written or oral contracts under the terms of which any such product or solvent is to be applied within the District.

6 ADMINISTRATIVE REQUIREMENTS

6.1 Calculation For Determining VOC Content Of Material Excluding Water And Exempt Compounds: For the VOC content as applied, the volume of material is defined as the volume of the original material plus any material (e.g., thinners, reducers, or catalysts) added to the original material. The weight of VOC per combined volume of VOC and material solids shall be calculated using the following equation:

\[
G_1 = \frac{W_v - W_w - W_{ec}}{V_m - V_w - V_{ec}}
\]

Where:
- \(G_1\) = Weight of VOC per volume of material, less water and exempt compounds, in grams per liter
- \(W_v\) = Weight of all volatile compounds, including any volatile materials added to the original material supplied by the manufacturer when calculating the VOC content as applied, in grams
- \(W_w\) = Weight of water, in grams
- \(W_{ec}\) = Weight of exempt compounds, in grams
6.2 **Calculation For Determining VOC Content Of Material Including Water And Exempt Compounds:** For the VOC content as applied, the volume of material is defined as the volume of the original material, plus any material added to the original material (e.g., thinners or reducers). For the VOC content as supplied, the volume of material is defined as the volume of the original material. The weight of VOC per total volume of material shall be calculated by the following equation:

\[
G_2 = \frac{W_v - W_c - W_{ec}}{V_m}
\]

Where:
- \( G_2 \) = Weight of VOC per total volume of material, in grams per liter
- \( W_v \) = Weight of all volatile compounds, in grams
- \( W_c \) = Weight of water, in grams
- \( W_{ec} \) = Weight of exempt compounds, in grams
- \( V_m \) = Volume of material, in liters

6.3 **Calculation Of Percent Of VOC By Weight:** The percent of VOC by weight is the ratio of the weight of the VOC to the weight of the aerosol adhesive or aerosol adhesive primer as supplied by the manufacturer, expressed as a percent of VOC by weight. The percent of VOC by weight shall be calculated as follows:

\[
Percent \ of \ VOC \ by \ Weight = \frac{W_{voc}}{W_p} \times 100
\]

Where:
- \( W_{voc} \) = Weight of VOC's in grams
- \( W_p \) = Weight of the adhesive or adhesive primer, as supplied by the manufacturer, in grams.

6.4 **Calculation For Determining Percent Control Efficiency And VOC Mass Emission Rate:** The VOC mass emission rate shall be calculated both upstream and downstream...
of the emissions control device and shall be based on the VOC mass concentration and volumetric flow rate, pursuant to Section 7.2.5 and the following equations:

6.4.1 VOC Mass Emission Rate:

\[
M = (Q) \times (C) \times (60 \text{ m/hr})(\text{calculated upstream and downstream})
\]

Where:

- \( M \) = VOC mass emission rate (upstream / downstream), in lb/hr.
- \( Q \) = the volumetric flow rate at the inlet (upstream) or exhaust stack outlet (downstream), in standard cubic feet per minute as determined by Section 7.2.5.
- \( C \) = the VOC mass concentration at the inlet (upstream) or outlet (downstream), in pounds per standard cubic feet, as determined pursuant to Section 7.2.5.

6.4.2 The percent control efficiency is calculated as follows:

\[
\%CE = \frac{M_u - M_d}{M_u} \times 100
\]

Where:

- \( CE \) = control efficiency.
- \( M_u \) = the upstream VOC mass emission rate, in lb/hr.
- \( M_d \) = the downstream VOC mass emission rate, in lb/hr.

6.5 Calculation For VOC Composite Partial Pressure: The VOC composite partial pressure is the sum of the partial pressures of the compounds defined as VOC’s, and shall be calculated by the following equation:

\[
P_{PC} = \sum_{i=1}^{n} \frac{(W_i)(VP_i)}{MW_i}
\]

\[
\frac{W_w}{MW_w} + \sum_{e=1}^{n} \frac{W_e}{MW_e} + \sum_{i=1}^{n} \frac{W_i}{MW_i}
\]

Where:

- \( PP_c \) = VOC composite partial pressure at 20 °C, in mm Hg.
- \( W_i \) = Weight of the “i"th VOC compound, in grams, as determined by ASTM E 260-96.
- \( W_w \) = Weight of water, in grams as determined by ASTM D 3792-99.
- \( W_e \) = Weight of the “e"th exempt compound, in grams, as determined by ASTM E 260-96.
- \( MW_i \) = Molecular weight of the “i"th VOC compound, in grams per g-mole, as given in chemical reference literature.
- \( MW_w \) = Molecular weight of water, 18 grams per g-mole.
- \( MW_e \) = Molecular weight of the “e"th exempt compound, in grams per g-mole, as given in chemical reference literature.
- \( VP_i \) = Vapor pressure of the “i"th VOC compound at 20 °C, in mm Hg, as determined by Section 7.2.10 of this rule.

6.6 Operation And Maintenance Plan: Any person using an approved emission control device pursuant to Section c.4 must submit an Operation and Maintenance Plan for the emissions control device to the Air Pollution Control Officer for approval. This Plan shall specify operation and maintenance procedures that demonstrate continuous operation and compliance of the emissions control equipment during periods of emissions-producing operations. This plan shall specify key system operating parameters necessary to determine compliance with this rule and describe in detail procedures to maintain the approved control device. The plan shall specify which records must be kept to document these operations and maintenance procedures. The records shall comply with the requirements of Section 7.1. This Plan shall be implemented upon approval by the Air Pollution Control Officer.

6.7 Labeling Requirement For Aerosol Adhesive:
6.7.1 Effective January 1, 2003, all aerosol adhesives listed under Section 5.2.2 shall be clearly labeled with the following information:
   6.7.1.1 The aerosol adhesive category as specified in Section 5.2.2,
   6.7.1.2 The maximum VOC content for the material specified in Section 5.2.2 expressed as percentage by weight,
   6.7.1.3 If the aerosol adhesive is classified as a special purpose adhesive, the applicable substrate and/or application or an abbreviation of the substrate/application that qualifies the product as special purpose. If an abbreviation is used, an explanation of the abbreviation must be filed with the Air Pollution Control Officer before the abbreviation is used.

6.7.2 The information required in Section 6.7.1 shall be displayed on the aerosol container so that it is observable without removing or disassembling any portion of the product container or package.

6.7.3 No person shall remove, alter, conceal, or deface the information required in Section 6.7.1.

6.8 Product Information Requirements For Sellers: Any person who sells any material subject to this rule shall make available to the purchaser at the time of sale the following information:

   6.8.1.1 The material type by name / code / manufacturer;
   6.8.1.2 For materials subject to Section 5.1: The maximum VOC content of the material as applied. The VOC content shall be displayed as grams of VOC per liter of material (or pounds of VOC per gallon), excluding water and exempt compounds. For low solids materials, the VOC content shall be displayed as grams of VOC per liter of material (or pounds of VOC per gallon), including water and exempt compounds;
   6.8.1.3 For aerosol adhesives listed in Section 5.2: The maximum VOC content as applied. The VOC content shall be displayed as percent by weight;
   6.8.1.4 For materials subject to Section 5.3.1: The maximum VOC content and the total VOC composite partial pressure of the material as applied. The VOC content shall be displayed as grams of VOC per liter of material (or pounds of VOC per gallon), including water and exempt compounds as determined pursuant to Section 7.2.1. The composite vapor pressure shall be displayed in millimeters of mercury at 20 °C (68 °F) as determined pursuant to Section 7.2.9; and
   6.8.1.5 For all materials subject to Sections 5.1 and 5.3.1: Recommendations regarding thinning, reducing, or mixing with any material.

7 MONITORING AND RECORDS

7.1 Recordkeeping: In addition to any existing permit conditions issued pursuant to Rule
400, any person subject to this rule, including operations exempt pursuant to Sections 3.3.8, 3.3.9, 3.3.10, 3.3.11, shall comply with the following requirements:

7.1.1 **List Of Materials:** A list shall be maintained of all materials currently used and/or stored at the site. The list shall include the following information:

- **7.1.1.1** The material type by name / code / manufacturer and the appropriate category as designated by the material categories in Sections 5.1, 5.2, and 5.3.
- **7.1.1.2** The actual VOC content of the materials listed in Section 5.1 as applied excluding water and exempt compounds or including and exempt compounds for a low solids material.
- **7.1.1.3** The actual VOC content of aerosol adhesives listed in Section 5.2 in percent by weight.
- **7.1.1.4** The actual VOC content of the cleaning material listed in Section 5.3.1, as applied including water and exempt compounds.
- **7.1.1.5** The VOC composite partial pressure for materials listed in Section 5.3.1 if applicable. The VOC composite partial pressure shall be calculated pursuant to Sections 6.5 and 7.2.9.
- **7.1.1.6** The actual mixing ratio for the material as applied.

7.1.2 **Product Information:** The information listed under Section 6.8.1 through 6.8.4 shall be maintained and made available to the Air Pollution Control Officer upon request.

7.1.3 **Record Of Usage:** Any person using materials regulated by this rule shall update and maintain the records as required by this rule as follows:

- **7.1.3.1 Daily**
  - **7.1.3.1.1** For Non Compliant Materials: Records regarding the use, including the lack of use, of each material type by name / code / manufacturer and the total applied volume in gallons.
  - **7.1.3.1.2** Records of usage of aerosol cleaning solvents exempt pursuant to Section 3.3.7 in ounces.

- **7.1.3.2 Monthly**
  - **7.1.3.2.1** Records of total applied volume in gallons for each material (including thinners, reducers, hardeners, retarders, catalysts, and cleaning materials), specified by material type as listed in Sections 5.1 and 5.3.1.
7.1.3.2.2 For stationary sources exempt pursuant to Section 3.3.9, record of all materials used (including thinners, reducers, hardeners, retarders, and catalysts) used in gallons. The annual usage in gallons per year shall also be calculated from the monthly usage records in order to verify the exemption in Section 3.3.7.

7.1.3.2.3 Records or total applied volume for each material exceeding the VOC limits specified in Sections 5.1 and 5.3.1 by name / code / manufacturer and material type.

7.1.3.2.4 For each type of aerosol adhesive listed in Section 5.2, the following records shall be kept:
   1. Records of percent by weight
   2. Size of the aerosol container in ounces, and
   3. Number of containers used.

7.1.4 Emission Control Equipment: Any person using an emission control device pursuant to Section 5.4 as a means of complying with this rule shall maintain:

7.1.4.1 On a daily basis:
   7.1.4.1.1 Such records as required by the operation and Maintenance Plan in Section 6.6; and
   7.1.4.1.2 Records of total applied volume in gallons for each material.

7.1.4.2 Records of test reports conducted pursuant to Section 7.2.

7.1.5 Duration Of Records: All records require by Section 7.1 shall be maintained on-site for a continuous five-years period and made available to the Air Pollution control Officer upon request.

7.1.6 Location Of Records: All records required by Section 7.1 shall be maintained on-site for a continuous 5 year period unless alternative recordkeeping is used pursuant to Section 7.1.7. The records shall be made available to the Air Pollution Control Officer upon request.

7.1.7 Alternative Recordkeeping: A person with an operation that requires the application of adhesives and sealant materials at multiple locations throughout the District shall notify the Air Pollution Control Officer in writing prior to using an alternative recordkeeping option that tracks the total combined usage from all locations and maintains the usage
information at one centralized location.

7.1.7.1 The notification shall include the following information:
   7.1.7.1.1 A list of all materials used or proposed for use at all
           locations throughout the District. The list shall contain
           the information required under Sections 7.1.1 and 7.1.2.
   7.1.7.1.2 The location where records will be kept.
7.1.7.2 A person using an alternative recordkeeping option shall maintain
           all of the following at the centralized location:
   7.1.7.2.1 A list of all materials currently used and/or stored that
           contain the information listed in Section 7.1.1.
   7.1.7.2.2 Product information as required by Section 7.1.2.
7.1.7.3 Records of the total combined usage in gallons for each material
           (including thinners, reducers, hardeners, retarders, catalysts, and
           cleaning materials) specified by material type as listed in Sections
           5.1 and 5.3.1. For each type of aerosol adhesive listed in Section
           5.2, records of percent by weight, size of the aerosol container in
           ounces, and number of containers used.
7.1.7.4 A person using an alternative recordkeeping option shall use (at all
           locations) only material that comply with the applicable VOC
           standards listed in Sections 5.1, 5.2, and 5.3.
7.1.7.5 A person using the alternative recordkeeping option shall notify
           the Air Pollution Control Officer in writing prior to discontinuing
           the alternative recordkeeping option.
7.1.7.6 A person using the alternative recordkeeping option shall submit to
           the Air Pollution Control Officer an updated list if new materials
           are added to the list originally submitted pursuant to Section
           7.1.7.1.1.
7.1.7.7 A person using the alternative recordkeeping option will be
           prohibited from future use of the alternative recordkeeping
           provision if found in violation with Section 7.1.7.3.

7.2 Test Methods:

   7.2.1 VOC content of non-aerosol adhesive or sealant products, surface preparation
          solvents, cleanup solvents, or strippers shall be determined in accordance with
          United States Environmental Protection Agency Method 24 or United States
          Environmental Protection Agency Method 24A, and Sections 6.1, 6.2, and 7.2.4 of
          this rule.
7.2.2 Determination Of VOC Content Of Aerosol Adhesives Or Aerosol Adhesive Primers: The VOC content of aerosol adhesives or aerosol adhesive primers shall be determined using South Coast Air Quality Management District Test Method 305 for aerosol coatings or equivalent method approved by the Air Pollution Control Officer and the United States Environmental Protection Agency.

7.2.3 Determination Of VOC Content Of Plastic Welding Cement Adhesive / Primer: The VOC content of ABS, CPVC, PVC, or other plastic welding cement adhesive or any plastic welding cement primer shall be determined by using the South Coast Air Quality Management District's Determination of Volatile Organic Compounds (VOC) in Materials Used for Pipes and Fittings, Method 316a.

7.2.4 Determination Of Compounds Exempt Form VOC Definition: Exempt compounds referenced in Section 4.25 and listed in Rule 101.4.38, shall be determined in accordance with ASTM D 4457-91 or California Air Resources Board Method 432. If any of the perfluorocarbons or volatile cyclic and linear methyl siloxanes are being claimed as exempt compounds, the person making the claim must state in advance which compounds are present, and identify the United States Environmental Protection Agency-approved test method used to make the determination of these compounds.

7.2.5 Determination Of Control Efficiency: Control efficiency of the emissions control equipment shall be determined in accordance with United States Environmental Protection Agency Method 18, 25, or 25A; or United States Environmental Protection Agency Method 2 or 2C (whichever is applicable).

7.2.6 Determination Of Collection Efficiency: Efficiency of the collection system shall be determined in accordance with the United States Environmental Protection Agency's Guidelines for Determining Capture Efficiency, January 9, 1995. Individual capture efficiency test runs subject to U.S. EPA technical guidelines shall be determined by:

7.2.6.1 Applicable EPA Methods 204, 204A, 204B, 204C, 204D, 204E, and/or 204F; or
7.2.6.2 Any other method approved by U.S. EPA, the California Air Resources Board, and the Air Pollution Control Officer.

7.2.7 Determination Of VOC Content Of Emissions: The VOC content of emissions shall be determined by United States Environmental Protection Agency Method 18.
7.2.8 **Determination Of Plasticizer Content:** The test method used to determine plasticizer content of flexible vinyls shall be ASTM Method E260-96, *General Gas Chromatography procedures*.

7.2.9 **Determination Of VOC Composite Partial Pressure:** VOC composite partial pressure shall be determined in accordance with ASTM E260-96 for organic compounds, and ASTM D 3792-91 for water content as applicable, and Sections 6.5, and 7.2.9 of this rule.

7.2.10 **Determination Of Vapor Pressure:** Vapor pressure of a VOC shall be determined in accordance with ASTM Method D2879-96, or may be obtained from the most current edition of published sources listed below or other standard science or engineering reference text.

7.2.10.1 *The Vapor Pressure of Pure Substances*, Boublik, Fried, and Hala; Elsevier Scientific Publishing Company, New York.

7.2.10.3 *CRC Handbook of Chemistry and Physics*, Chemical Rubber Publishing Company.

7.2.10.4 *Lange’s Handbook of Chemistry*, John Dean, editor, McGraw-Hill Book Company.

7.2.11 **Determination Of VOC Content Cyanoacrylate:** The VOC content of cyanoacrylate adhesives shall be determined by the South Coast Air Quality Management District's Method 316B.
